

Posters

- 1 **Arash Azhand** (*Technische Universität Berlin, Germany*)
New type of autonomous pacemaker in a confined chemical excitable medium
- 2 **Abderrahim Azouani** (*Freie Universität Berlin, Germany*)
Feedback control using general interpolant observables and continuous data assimilation
- 3 **Javier Cerillo** (*Technische Universität Berlin, Germany*)
Non-Markovian dynamical maps: numerical processing of open quantum trajectories for propagation and control
- 4 **Georg Engelhardt** (*Technische Universität Berlin, Germany*)
Signatures of the excited-state quantum phase transition in the periodic dynamics of the Lipkin-Meshkov-Glick model
- 5 **Sascha Gerloff** (*Technische Universität Berlin, Germany*)
Non-equilibrium dynamics of a binary mixture of confined colloidal particles in planar shear flow
- 6 **Robert Gernert** (*Technische Universität Berlin, Germany*)
On the waiting time distribution for continuous systems
- 7 **Thomas Isele** (*Technische Universität Berlin, Germany*)
Propagation and propagation failure of waves on excitable tree networks
- 8 **Julia Kabuß** (*Technische Universität Berlin, Germany*)
Theory of an optically pumped quantum dot phonon laser
- 9 **Marie Kapeller** (*Technische Universität Berlin, Germany*)
Analytical investigation of oscillation death with different number of clusters
- 10 **Andrew Keane** (*University of Auckland, New Zealand*)
Bifurcation analysis of a model for the El Niño southern oscillation
- 11 **Wassilij Kopylov** (*Technische Universität Berlin, Germany*)
Time-delayed feedback control of the Dicke-Hepp-Lieb superradiant quantum phase transition
- 12 **Alexander Kraft** (*Technische Universität Berlin, Germany*)
Application and analysis of time-delayed feedback control on the Swift-Hohenberg equation
- 13 **Josef Ladenbauer** (*Technische Universität Berlin, Germany*)
Spike rate dynamics of coupled adaptive model neurons
- 14 **Judith Lehnert** (*Technische Universität Berlin, Germany*)
Controlling cluster synchronization by adapting the topology
- 15 **Sarah Loos** (*Technische Universität Berlin, Germany*)
Transport in one-dimensional controlled rocking ratchets
- 16 **Kathy Lüdge** (*Technische Universität Berlin, Germany*)
Exploring multistabilities and partial synchronization in coupled laser networks (abstract on page 45)
- 17 **Steffen Martens** (*Technische Universität Berlin, Germany*)
Control of wave propagation through channels with varying cross-section
- 18 **Nicolas Naumann** (*Technische Universität Berlin, Germany*)
Steady state control in an unstable optomechanical system
- 19 **Iryna Omelchenko** (*Technische Universität Berlin, Germany*)
Robustness of chimera states
- 20 **Anup Purewal** (*University of Auckland, New Zealand*)
A global view of Pyragas time-delayed feedback control

Posters

- 21 **Carlos Quintero** (*Universitat Politècnica de Catalunya, Barcelona, Spain*)
Experimental control of laser optical spikes via direct current modulation
- 22 **Isabelle Schneider** (*Freie Universität Berlin, Germany*)
Eliminating restrictions of time-delayed feedback control using equivariance
- 23 **Julien Siebert** (*Technische Universität Berlin, Germany*)
Effect on nonlocal and time-delayed feedback on front propagation in the Schlögl model
- 24 **Aleksandr Sorokin** (*Technische Universität Berlin, Germany*)
Quantum phase transitions in networks of Lipkin–Meshkov–Glick models
- 25 **Jan F. Tetz** (*Technische Universität Berlin, Germany*)
Scroll Ring Dynamics under Spatial Confinement
- 26 **Matthias Wolfrum** (*WIAS, Berlin, Germany*)
Nonuniversal transitions to synchrony in the Sakaguchi-Kuramoto model
