

Posters

- 1 **Fabian Baumann** (*Technische Universität Berlin, Germany*)
A stochastic Fokker-Planck equation for the dynamics of finite-sized neuronal populations
- 2 **Nikita Begun** (*Freie Universität Berlin, Germany*)
Pattern Formation and Chaotic Dynamics in Processes with Hysteresis
- 3 **Leon Droenner** (*Technische Universität Berlin, Germany*)
Control of many-body localization in a network of disordered quantum spins
- 4 **Georg Engelhardt** (*Technische Universität Berlin, Germany*)
Topological instabilities in ac-driven bosonic systems
- 5 **Sebastian Eydam** (*Weierstraß-Institut, Berlin, Germany*)
Mode-locking in systems of phase oscillators with higher harmonic interaction
- 6 **Ingo Fischer** (*Universitat de les Illes Balears, Spain*)
Consistency of dynamical systems driven by delay-induced chaos
- 7 **Sascha Gerloff** (*Technische Universität Berlin, Germany*)
Shear-induced transport mechanisms in dense colloidal suspensions in confinement
- 8 **Felix Herrmann** (*Technische Universität Berlin, Germany*)
Prediction of disease arrival times in temporal networks
- 9 **Peter Kalle** (*Technische Universität Berlin, Germany*)
The dynamics of viscoelastic liquids under time-delayed feedback
- 10 **Andreas Koher** (*Technische Universität Berlin, Germany*)
Effective distances on complex networks - How fast is an infection?
- 11 **Wassilij Kopylov** (*Technische Universität Berlin, Germany*)
Time delayed control of excited state quantum phase transitions in the Lipkin-Meshkov-Glick model
- 12 **Manuel Kraft** (*Technische Universität Berlin, Germany*)
Time-delayed quantum coherent Pyragas feedback control of photon squeezing in a degenerate parametric oscillator
- 13 **Robert Lasarzik** (*Technische Universität Berlin, Germany*)
Measure-valued solutions and weak-strong uniqueness
- 14 **Jakob Löber** (*Technische Universität Berlin, Germany*)
Linear structures in nonlinear optimal control
- 15 **Benjamin von Lospichl** (*Technische Universität Berlin, Germany*)
Control of steady and oscillatory states in simple models of shear banding
- 16 **Steffen Martens** (*Technische Universität Berlin, Germany*)
Control of traveling localized spots
- 17 **Nicolas Naumann** (*Technische Universität Berlin, Germany*)
Feedback control of driven quantum systems
- 18 **Oleh Omel'chenko** (*Weierstraß-Institut, Berlin, Germany*)
Regular and irregular patterns of self-localized excitation in arrays of coupled phase oscillators
- 19 **Bootan Raman** (*University of Sussex, United Kingdom*)
Dynamics of ring neural network with time delays
- 20 **Sina Reichelt** (*Weierstraß-Institut, Berlin, Germany*)
Competing patterns in anti-symmetrically coupled Swift-Hohenberg equations

Posters

- 21 **Jakub Sawicki** (*Technische Universität Berlin, Germany*)
Chimera states in hierarchical networks of Van der Pol oscillators
- 22 **Christian Schaaf** (*Technische Universität Berlin, Germany*)
Inertial migration of elastic capsules in Poiseuille flow
- 23 **Frederik Schirdewahn** (*Technische Universität Berlin, Germany*)
Surveillance for outbreak detection in livestock-trade networks
- 24 **Nadezhda Semenova** (*Saratov State University, Saratov, Russia*)
Coherence-resonance chimeras in networks of FitzHugh-Nagumo oscillators
- 25 **Konstantin Sergeev** (*Saratov State University, Saratov, Russia*)
Noise influence on steady states and metastable modes in a nonlinear chain of interacting non-oscillating elements
- 26 **Liudmila Tumash** (*Technische Universität Berlin, Germany*)
Stuart-Landau networks: chimera states and cluster synchronization
- 27 **Tatiana Vadivasova** (*Saratov State University, Saratov, Russia*)
Chimera states in a ring of linear oscillators with local nonlinear unidirectional interaction
- 28 **Nicola Vassena** (*Freie Universität Berlin, Germany*)
Monomolecular reaction networks: flux-influenced sets
- 29 **Christopher Wächtler** (*Technische Universität Berlin, Germany*)
Stochastic thermodynamics based on incomplete information: Generalized Jarzynski equality with measurement errors with or without feedback
